Jain (Deemed-to-be University), Bengaluru

April 2024 – Expected November 2026

### Bachelor of Computer Applications (BCA)

REVA University, Bengaluru (CGPA: 8.7)

Jan 2019 – Dec 2022

### Intended graduate study

Columbia University Mailman School of Public Health - Public Health Management (PHM) / Health Policy & Management pathway, in support of scaling Medigo Rapid Care

---

## FOUNDER & VENTURE EXPERIENCE

---

### Founder

Medigo Rapid Care · Full-time · [medigo.tech](https://medigo.tech)

Dec 2024 – Present

- Founded Medigo with the vision of improving how people access healthcare during emergencies and critical moments.
- Building an emergency healthcare platform designed to connect patients with timely medical assistance, first aid guidance, healthcare professionals, responders, and hospitals.
- Leading product strategy, technology, business development, partnerships, and operations across the venture.
- Developing a connected ecosystem for patients, doctors, ambulances, hospitals, and emergency responders, with a focus on reducing delays in accessing appropriate care.
- Building the product across patient, doctor, ambulance, and hospital platforms, while developing the operational framework required to support rapid emergency response.
- Working on partnerships with healthcare professionals, hospitals, ambulance providers, and community responders to establish the network required for the platform.
- Leading Medigo's brand, community building, awareness campaigns, and early-stage growth strategy.
- Building and managing the founding team, currently expanding across technology and social media, while creating a culture centered around ownership, innovation, and an entrepreneurial mindset.

### Founder

deHub · Full-time · On-site

Sep 2024 – Aug 2025

- Founded and developed deHub, a community-driven quick-commerce platform designed to connect local communities with everyday commerce.
- Led the product from concept to early-stage development, including product strategy, technology, UI/UX, and business model development.
- Designed and developed the initial platform, focusing on community-driven commerce and local retail integration.
- Worked on product validation, user experience, operations, and the technology infrastructure required to support the platform.
- Built the initial foundation and successfully transitioned the venture to new leadership for its next phase of development.

### Chief Executive Officer & Director

techvestors · Full-time · Bengaluru, Karnataka, India

Oct 2021 – Aug 2025

- Founded and led Techvestors, a technology solutions company focused on helping businesses turn ideas into practical digital products, systems, and streamlined operations.
- Led business strategy, product development, technology, and client relationships.
- Delivered websites, mobile applications, custom software, digital marketing, graphic design, automation, and IT solutions for businesses.
- Provided technical consultations and CTO-as-a-Service support to organizations without dedicated in-house technical leadership.
- Worked directly with clients to understand business requirements and translate them into practical technology solutions.

- Helped organizations streamline technology workflows, optimize processes, and automate repetitive operations to improve efficiency.
- Built and managed development teams across multiple projects and technologies; oversaw projects from ideation through development, deployment, and ongoing support.
- Developed Techvestors as a technology partner for businesses looking to improve, modernize, and scale technology operations; managed partnerships, sales, operations, and company growth.

## ADDITIONAL PROFESSIONAL EXPERIENCE

---

### IT Head - Chile

*Feb 2026 – Present*

*Kalpataru Power Chile SpA (KPC), Kalpataru Projects International Limited (KPIL) · Santiago, Chile*

- Own IT infrastructure and provide daily technical support to users across Chile, Guyana, and Suriname.
- Built automation (document translation plugin; bulk contracts/offer letters/rent agreements) and a Power Automate news watchdog cutting ~90% of the annual service cost.
- Delivered an offline meal-token application using ultrasound data transmission; lead on-premises RAG enterprise AI R&D and applied IoT research.
